

WHAT IS HAPPENING IN AMAZON DEFORESTATION?

Brazilian conservation policies **ARE MAKING PROGRESS**

New deforestation policies introduced

Deforestation rates dropped by **80%**

BUT

monitoring satellites **CAN'T DETECT** small clearings those smaller than **25 HECTARES** (~ 30 soccer fields)

large clearings

✓ **DETECT**

small clearings

✗ **CAN'T DETECT**

As a result, small clearings **ARE RISING** as a percentage of overall deforestation

X
small clearings / large clearings

People changed how they deforest to **AVOID DETECTION**

Deforestation practices differed from state to state

NEW POLICIES must tackle **REGIONAL DIFFERENCES** to strengthen the fight against deforestation
