ClimateShot Investor Coalition (CLIC)

Global food systems account for roughly one quarter of total anthropogenic greenhouse gas emissions and close to 60% of global biodiversity loss. Despite this, only around 2% of global climate finance is directed towards agriculture and related sectors.

CLIC aims to rapidly scale-up the finance necessary to shift towards low-carbon, climate-resilient and nature-positive agriculture and food systems globally, thus delivering on the ambitions of the Glasgow Breakthrough Agenda on Agriculture agreed at COP26.

To achieve this goal, CLIC is a member-driven coalition with a focus on three key outcomes within the agriculture and food systems sectors:

01. Greater consensus on priorities for climate and nature finance

02. Greater use of evidence-based solutions to reduce transaction costs and risks and improve monitoring and reporting

03. Increased finance mobilized globally

OUR THEORY OF CHANGE

<table>
<thead>
<tr>
<th>IMPACT</th>
<th>Accelerate and scale up climate and nature finance for agriculture and food systems by bridging demand and supply along the continuum of capital</th>
</tr>
</thead>
<tbody>
<tr>
<td>OUTCOMES</td>
<td>Greater consensus on priorities for climate and nature finance in the sector</td>
</tr>
<tr>
<td>OUTPUTS</td>
<td>Research, evidence, and thought leadership developed and disseminated</td>
</tr>
<tr>
<td>ACTIVITIES</td>
<td>Knowledge generation, data gathering, &amp; learning</td>
</tr>
</tbody>
</table>
HOW WE FOSTER ACTION

- Facilitating exchange between the diverse leaders within the coalition.
- Connecting with aligned initiatives to explore efficiencies and amplify efforts.
- Promoting cutting-edge evidence, data, and science-based tools for decision making in investments and impact measurement.
- Supporting members to test innovative, science-based tools and approaches in their operations and share lessons.
- Assessing tools and approaches’ effectiveness, then refine them and use them to build innovative financial solutions.
- Supporting members to incorporate innovative solutions in their investment decisions to catalyze additional finance at speed.

**Action Group 1: Financial Innovation**
Amplifies members’ efforts to structure and develop innovative, science-backed finance vehicles, and supports pipeline development through learning dissemination and partnerships for businesses acceleration.

**Action Group 2: Evidence-based Tools**
Enables the impact investing community to step up risk assessment and impact measurement in agriculture and food systems interventions via the promotion of scientific evidence and effective utilization of tools and methodologies for data collection.

**The CLIC Agrifood Investment Connector**
The Connector develops a high-quality pipeline of climate and nature-positive agrifood businesses in developing economies and facilitates meaningful connections with interested investors.
